Deferred consideration is generated when a sale of a royalty interest linked to revenue at a specific facility occurs. Proceeds for sale of a royalty interest are an upfront payment received for future saltwater disposal services that will generate future royalties. The estimated future saltwater disposal revenues from the facility are multiplied by the royalty rate of 9% per annum to derive the upfront payment received, which is accounted for as deferred consideration and recognized as an offset to royalty expense over the life of the facility.

15. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

Net investment in foreign operations

The Company hedges its net investment in foreign operations with US dollar denominated debt that has a carrying value excluding unamortized transaction costs of \$5,116,452 (US\$3,784,358) at September 30, 2023 (December 31, 2022 - \$9,655,328 (US\$7,128,860)). No hedge ineffectiveness was recognized during the three and nine months ended September 30, 2023 and 2022.

Financial instruments and risk management

The Company's activities expose it to a variety of financial risks: credit risk, liquidity risk, foreign currency risk, interest rate risk and commodity risk. The Company's overall risk management program focuses on the unpredictability of financial markets and seeks to minimize potential adverse effects on the Company's financial performance.

Three and nine months ended September 30, 2023 and 2022 (Unaudited) (All figures expressed in Canadian dollars unless otherwise noted)

Risk management is carried out by senior management.

Fair values

The Company's financial instruments recognized on the condensed consolidated interim statement of financial position consist of cash and cash equivalents, trade and other receivables, promissory note receivable, deposits, promissory notes payable, operating loan, trade and other payables, loans payable, long-term debt, lease liabilities and deferred consideration. The fair values of the cash and cash equivalents, trade and other receivables, promissory note receivable, deposits, operating loan and trade and other payables approximate their carrying value due to the short-term or demand nature of these instruments. Loans payable, promissory notes payable, long-term debt, lease liabilities and deferred consideration are carried at amortized cost.

The Company has classified its financial instrument fair values based on the required three level hierarchies:

- Level 1: Valuations based on quoted prices in active markets for identical assets or liabilities;
- Level 2: Valuations based on observable inputs other than quoted active market prices; and
- Level 3: Valuations based on significant inputs that are not derived from observable market data, such as
 discounted cash flows methods.

The fair value hierarchy level at which a fair value measurement is categorized is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. The Company records cash and cash equivalents at fair value using level 1 inputs. There were no transfers from levels 1, 2 and 3 during the period.

Credit risk

Credit risk arises when a failure by counter parties to discharge their obligations could reduce the amount of future cash inflows from financial assets at the reporting date. A substantial portion of the Company's trade and other receivables balance is with customers in the petroleum industry and is subject to normal industry credit risks.

The Company manages its exposure to credit risk through standard credit granting procedures and short payment terms. The Company attempts to monitor financial conditions of its customers and the industries in which they operate. The Company's maximum exposure to credit risk at September 30, 2023 was the total of cash and cash equivalents, trade and other receivables and promissory note receivable of \$5,697,372 (December 31, 2022 - \$9,788,652). The Company believes that there is no unusual exposure associated with the collection of these trade and other receivables and promissory note receivable. As at September 30, 2023, the Company has an allowance for doubtful accounts of \$nil (December 31, 2022 - \$nil).

Pursuant to the White Owl Epping Joint Venture Agreement ("Epping Agreement") dated July 18, 2018, White Owl as operator is responsible for the payment and discharge of all expenses of the joint venture and is entitled to be reimbursed for these expenses. Under the Epping Agreement, the Company will be reimbursed for all direct operating costs and will be paid an operating fee of 8% of the cost of operations and a fee of 3% of capital expenditures. As at September 30, 2023, trade and other receivables includes \$114,094 (December 31, 2022 - \$386,022) in amounts invoiced to the joint venture owners for their proportionate share of operating losses and capital expenditures of the facility, while trade and other payables includes \$4,449 (December 31, 2022 - \$57,652) in amounts payable for operating income and capital expenditures of the facility.

The aging of trade and other receivables is as follows:

(\$000's)	Current	30-60 days	60-90 days	90+days	Total
	3,114	498	446	183	4,241

Management considers capital to be the Company's operating loan, loans payable, promissory notes payable, lease liabilities, long-term debt and shareholders' equity as the components of capital to be managed.
